Brian:

The previous spreadsheets contained only detected compounds as reported by the PRP's in Phase 1. PCBs and pesticides were not detected in the samples. Attached are spreadsheets that the PRPs used to build the other spreadsheets. These contain all of the data. The Solid – Human and Solid – Ecological spreadsheets contain the same results but just compare the results to different criteria. Let me know if you have any questions or need anything else.

Bob

I did not see any data for PCBs or pesticides, did I miss something?

Thanks

Brian:

Attached are Excel spreadsheets of the detected compounds from the previous work performed by the PRP's. The spreadsheets are divided by AOC and each spreadsheet is divided further by media and COC. Let me know if you have any questions or need anything else.

Attached is a pdf of the signed FSP and QAPP for the Falcon Refinery RI/FS. Please note that EPA would like to schedule a meeting to discuss the sampling schedule after we have had an opportunity to review the PRPs original data. Please let me know if you have any questions and or when the PRP data set will be available for EPA's review

Thanks
